

# Welcome to the GitHub Copilot 1-Day Training Course!

To ensure a smooth and productive learning experience, please complete the setup before class.

## Course Overview

Review the course outline and schedule here:  [Course Catalog - GitHub Copilot 1-Day](#)

## Pre-Class Setup (Required)

Please complete the installation for your chosen track before the training session:  [Installation Instructions](#)

Choose your track:

Track	Project	Description
Java Track	Spring Boot Task Manager	Web application with H2 database
Python Track	FastAPI Task Manager	Web application with SQLite
.NET Track	ASP.NET Core Task Manager	Web application with SQLite
Python Data Analysis Track	Data Analysis Pipeline	Pandas, Matplotlib, Seaborn

The installation guide includes OS-specific instructions for both **Windows** and **macOS**.

## Checklist Before Class

- ☐ GitHub account with Copilot access enabled
- ☐ VS Code installed (or Visual Studio for .NET)
- ☐ GitHub Copilot extension installed and authenticated
- ☐ Track-specific prerequisites completed:

Track	Prerequisites
Java	JDK 21+
Python	Python 3.11+
.NET	.NET 9+ SDK
Data Analysis	Python 3.9+ with Jupyter
